

Manchester Free Software

manchester.fsuk.org

Manchester Free Software was formed in response to an apparent growing need for a group based in the Manchester area that focuses on free software, GNU/Linux and issues like Digital Restrictions Management (DRM) which infringe on the freedoms of computer users.

Our monthly meetings provide an opportunity to meet with like minded people. We have regular speakers and we welcome along anyone who is interested in free software.

*Next meeting 20th May 7pm at the
MDDA, Portland Street, Central
Manchester. Come along!*
